

Job description: Environmental Consultant

APAQ Group is a highly skilled regional specialist company, focusing on air pollution control/environmental monitoring systems. We provide governments, industries and environmental companies with consulting and training services on air pollution impact assessment and control strategy, and undertake turn-key contracts on supply, operation and maintenance of air monitoring systems and instrumentation.

APAQ is headquartered in Singapore with a representative office in Jakarta and project partners spanning the ASEAN Region. We are looking for an Environmental Consultant for our Indonesian branch.

Join the APAQ family today!

Responsibilities

- Undertake technical analysis such as air quality standards and compliance, pollution control efficiencies and emission estimations supporting Environmental Impact Assessment (EIA) or environmental compliance monitoring projects.
- Undertake environmental monitoring & testing projects, involving operation, maintenance and calibration of professional equipment and collection of sample from various industrial and construction sites.
- Support day to day business development and sales activities, such as preparing technical presentation, project proposal and budgeting for client meetings and management review.
- Some field activities, including coordinating/managing subcontractor, technicians and workers to ensure environmental services are delivered in the safe and proper manner.

Education and Skills Requirement

- Degree in Environmental Engineering, Environmental Science, Geography background or relevant engineering/science disciplines
- Experience with Air Quality Modeling (AERMOD, CALPUFF) is a big plus
- Good in verbal and written skills in English and Bahasa preferred
- Good working skills with Microsoft Word, Excel and PowerPoint, especially in data processing and analysis
- Willing to be placed in Jakarta, Indonesia and travel to sites
- Good interpersonal and communication skills and able to work independently as well as in a team.
- Possess planning, organisational, analytical, problem solving and decision-making skills.

Interested applicants, please send in your resume and cover letter to: info@apaq-group.com
